

Cybersafety. Evolved.

Introducing Linewize Evolve

A new, best-of-breed cybersafety partnership for schools on the journey to 1:1 school-provided devices.

*We don't compromise on standards.
Neither should you.*

The why

Because all students deserve to be safe online, no matter the device

Online safety matters to all of us, regardless of the device program a school runs. Some schools are fully BYOD and committed to that direction. Others have been 1:1 for years. But what about schools moving from BYOD towards school-provided devices?

Historically, your cybersafety choices have been limited. We'll be honest, we were part of the problem. As a company specialising in school-provided device programs, our position was clear: if we couldn't provide the same level of support and protection to every child, we weren't the right partner yet.

Over the last few years, our advice to schools with BYOD was usually to look elsewhere. Not because we didn't want to help, but because we hadn't found a solution we believed met the same high standards we expect for school-provided devices.

But then we found a new problem. What we were recommending wasn't doing the job. Schools kept feeding back that there were too many compromises, too much noise. Not enough clarity. Reporting that was difficult to act on. Visibility that didn't go deep enough to support the students who needed it most.

The compromise was accepting a lower standard of cybersafety simply because no better option existed. We believed schools deserved better. So instead of pointing schools elsewhere, we went looking for a better answer. We needed a partner whose people, passion and products shared the same high standards we set for ourselves.

We found that in Fastvue.

And Linewize Evolve was born.

What is Linewize Evolve?

Linewize Evolve is a best-of-breed cybersafety partnership between Linewize and Fastvue.

It brings together the leading solution for school-provided devices, the leading visibility platform for BYOD environments, and world-leading parental controls for families. Schools no longer need to settle for a single provider that does a little bit of everything. With Evolve, every device gets the specialist technology it deserves.

Whatever stage your school is at, **you don't have to compromise on standards.**

The what

What do you get through this partnership?

1. The leading cybersafety team globally

When you choose Linewize Evolve, you're working with two of the most established cybersafety companies in the world, brought together for the first time under one agreement and supported through one team.

Linewize

The world's largest provider of K-12 cybersafety and digital wellbeing solutions.

Fastvue

More than 15 years helping IT teams turn network data into meaningful insights.

Together, we support more than:

35M
students

9M
families globally

32,000
schools

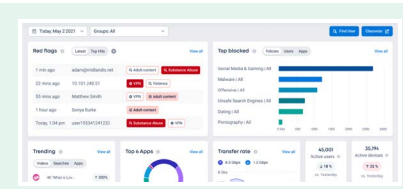

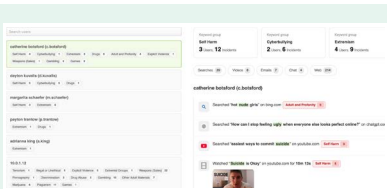

2. Best-in-breed cybersafety solutions

Linewize Evolve brings together technologies designed for different environments, giving schools accurate, meaningful and granular visibility into student activity, regardless of the device being used.

Rather than relying on a single provider to do a little bit of everything, Evolve combines the strongest solution for school-provided devices, the strongest visibility platform

for BYOD environments, and world-leading parental controls for families at home.

No single provider has delivered all three to the standard schools deserve. **Until now.**

		
<p>Linewize Connect The leading solution for school-provided device programs.</p> <p>Device-level filtering and reporting, classroom internet controls, and integrated parental controls. Protection that travels with students wherever they go.</p>	<p>Fastvue Reporter The leading visibility platform for BYOD environments.</p> <p>Connects to your existing firewall and transforms network activity into clear, actionable insights your IT team can use to better understand and support students.</p>	<p>Qustodio Parental Controls World-leading parental controls for families.</p> <p>Giving parents greater visibility and control at home, including filtering, screen time management, app restrictions, and support for healthy digital habits.</p>

As your school progresses through the partnership, additional solutions can be introduced as needed.

3. A partnership built on people, not just products

Technology is the easy part. What matters is having the right people behind it.

Choosing Linewize Evolve means choosing a different kind of relationship. A cybersafety partnership built on the same culture of high standards, genuine care, and accountability that Linewize schools have come to expect. That means one team managing your relationship.

One contact when something needs attention. And two companies with a shared investment in making sure your school gets the outcome it deserves.

The solutions are world class.
The people behind them are too.

The How

How this partnership works

How does the Evolve site licence work?

Linewize Evolve is a three-year programme giving you full use of Linewize Connect, Fastvue Reporter, and Qustodio parental controls. It's a single site licence based on your school's total K-12 roll that gives you access to the right technology for each device. Your Linewize representative can walk you through what this looks like for your specific school and rollout timeline.

Who do we contact for support?

All support, onboarding, training, and account management goes through Linewize. If Fastvue expertise is needed, Linewize will bring their team in directly. One point of contact throughout.

How quickly can this be deployed?

Faster than most schools expect. For schools on supported firewalls, implementation can often be completed within hours of your school domain and public-facing IP address being confirmed.

Is Fastvue part of Linewize?

No. This is a genuine partnership between two independent companies. Both continue to operate separately. Schools benefit from both technologies without either company changing direction.

Is there an additional cost for existing Linewize schools?

For existing Linewize customers with BYOD year groups, the cost of Fastvue Reporter for those students is absorbed by Linewize. No change to your current contract and no additional invoice.

Can we start with just one year group?

Yes. The rollout model works at whatever pace suits your school. The site licence covers your whole school from day one, so protection is in place regardless of where the managed device rollout is at.

Let's talk

Whether you're managing a mixed-device environment today or planning your next step towards 1:1, we'd love to show you what Linewize Evolve could look like in your school.
