by Qoria

Welcome to **Linewize Connect**

Linewize Connect is a complete end-to-end solution that enables IT teams to unite all stakeholders, including teachers and parents, behind a shared goal of keeping children safe and protected at school, at home – and everywhere in between.

Helping everyone who plays a part

Why do schools choose **Linewize Connect?**

> Being able to partner with parents, empowering them, providing them with information, and coaching them to have regular conversations with their kids has been really important to us."

Derek Champion,
Acting Deputy Head of Pastoral Care
Shore

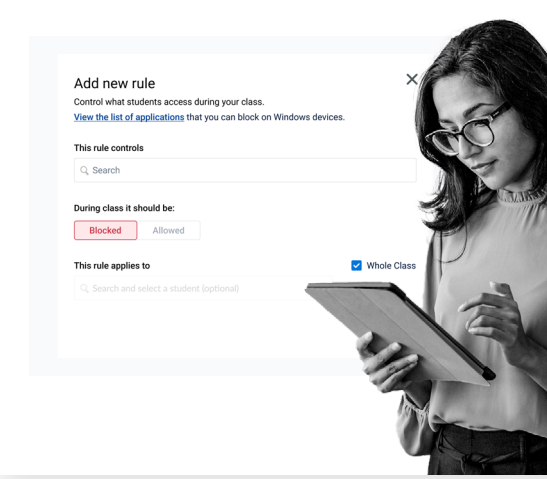

> As we rolled out our 1:1 program, we weren't just looking for a filtering platform. We wanted a partner with an end-to-end solution, a solution that was an agent, eliminating the need for multiple appliances and ensuring students' safety both in and out of school."

Issam Ibrahim, Head of IT
Minarah College

> The ability to empower all stakeholders with relevant tools and insights has been game-changing. It has not only improved student online behaviours but has also enhanced teaching and learning. The ability to create custom reports, individual student alerts and more enables better decision-making for and about our students."

Achilles Gabon, IT Manager
Bayside Christian College

Linewize by Qoria

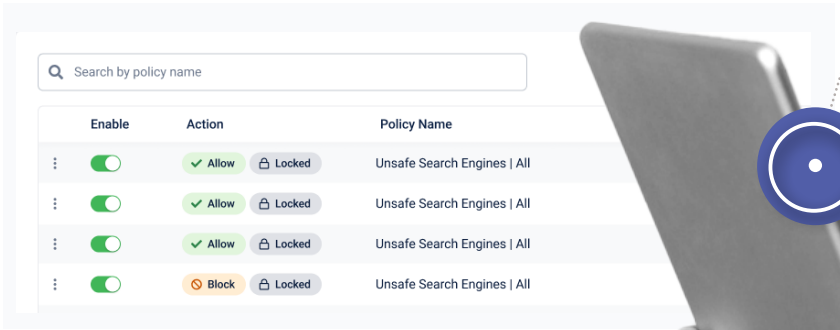

Empowering all stakeholders from a **single platform**

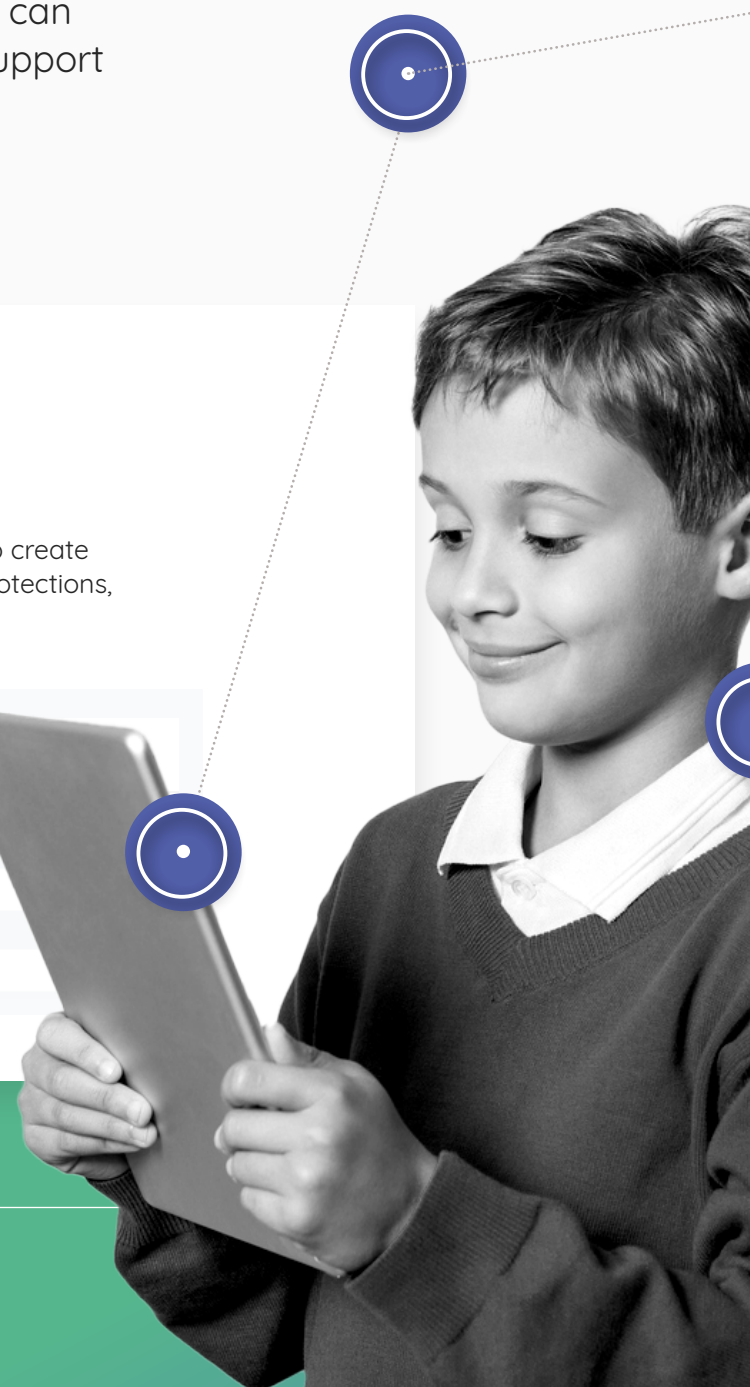

Designed from the ground up to meet the diverse needs of all those invested in a child's digital wellbeing, with Linewize Connect schools can establish a cohesive safety network to support every student's digital development.

Here's how.

Protecting the device, **not just the network.**

Granular and flexible filtering tools allow IT teams to create rules that ensure students always have the same protections, even if they are hotspotting.

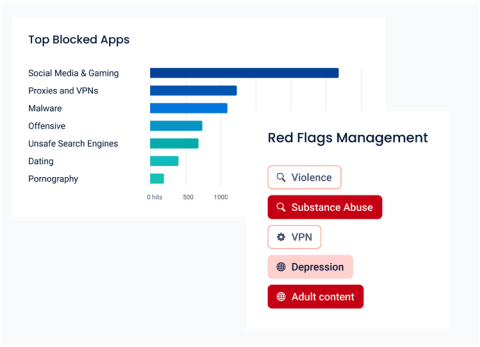

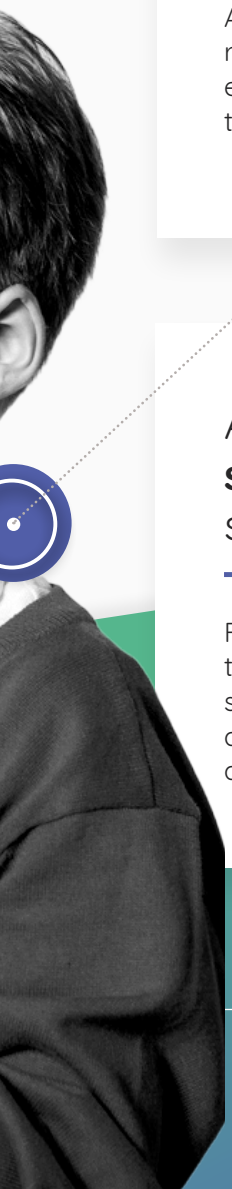

Giving teachers **complete internet control** in the classroom.

Powerful and intuitive classroom tools allow teachers to monitor screens, pause the internet, and create their own rules to support their digital learning objectives, all without IT losing control of device safety.

Creating custom reports - down to the individual student.

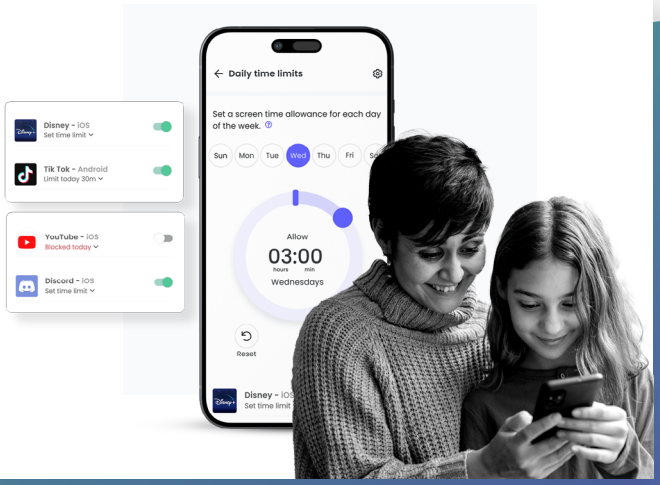

Advanced peer comparison reports, AI risk detection, real-time alerting tools, and individual user dashboards enable IT teams to ensure the right information reaches the right stakeholders at the right time.

Allowing **parents to manage school devices** outside of school hours.

Fully integrated parental controls enable IT teams to keep devices safe outside of the school gates while allowing parents to steer and direct their children's online behaviour and habits.

Linewize Connect
Features and Benefits

Linewize Connect brings together a powerful suite of highly configurable tools.

Let's explore them in more detail:

Linewize Filter

Filter, reporting and real-time alerting

Linewize Filter is the engine room that drives Connect.

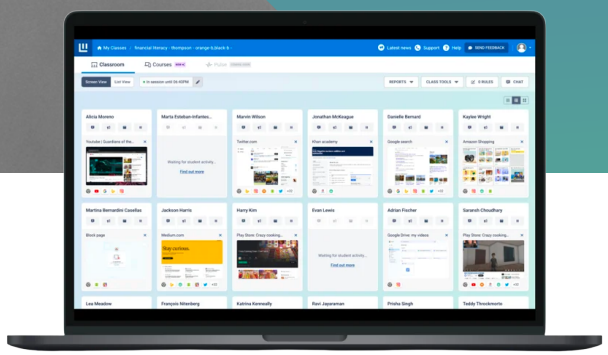

Through Linewize Filter Linewize Connect offers schools exceptionally granular control over what can and cannot be accessed on devices. Whether it's implementing always-on rules to protect all students from harmful or inappropriate content, or creating more targeted rules to support students with unique needs, Linewize Connect ensures a safe and tailored digital environment.

Moreover, through tailored dashboard access, periodic group reporting, and targeted real-time alerts, Linewize Connect equips schools with the means to quickly identify students whose digital behaviours may be cause for concern, allowing schools to proactively intervene and provide the right response to achieve the best outcomes for each child.

Key features:

- 24/7 filtering and reporting on school devices and accounts provide safer learning anywhere, anytime, and for every student.
- Granular and flexible filtering rules deliver perfectly shaped learning environments for each individual student.
- Greater depth of visibility provides non-technical staff with an understanding of trends and patterns in behaviour and device use to guide students toward effective technology use.
- Custom reporting allows schools to have specific and targeted conversations concerning students on particular issues such as cyberbullying, violence, and self-harm.

Classwize

Classroom internet management tools for teachers

Classwize is the classroom component of Connect.

Through Classwize Linewize Connect can give educators in the classroom access to control and manage the use of the Internet to meet their digital learning objectives.

From a dedicated dashboard teachers can control everything students see in class, easily pre-plan what sites are accessed before class begins, spot if a student goes off track and blocks what they're looking at; permit group or individual access to new sites during class - and so much more. All without the reliance on IT.

Key features:

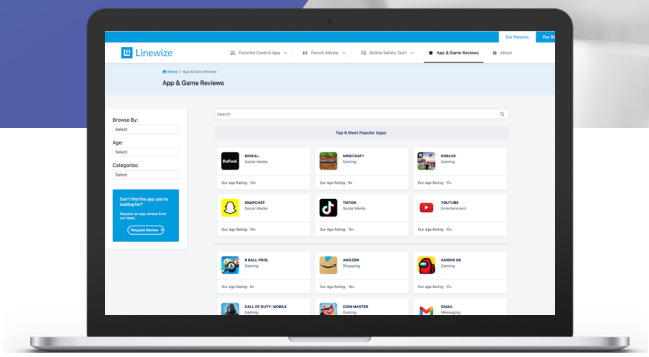

- See student screens in real-time and access detailed reports after lessons on device usage to ensure teachers can have regular, targeted evidence-based conversations.
- Block or unblock digital learning resources as needed to reduce digital distractions and maximise academic learning time.
- Quickly spot inappropriate or off-task internet use as it happens, redirect attention as needed, and gain control quickly by pausing the internet.
- Send messages or instructions to the whole class or specific students to ensure all students understand what is expected in their lesson.

Linewize Connect
Features and Benefits

Linewize Connect brings together a powerful suite of highly configurable tools.

Let's explore them in more detail:

Online Safety Hub

Cyber safety information and resources for the entire community

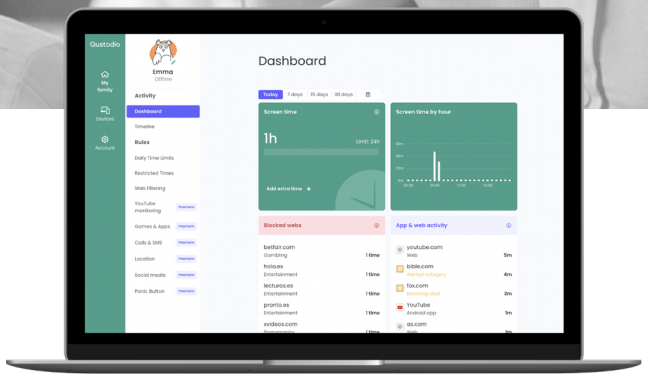

With Linewize Connect schools get their own school-branded Online Safety Hub a dedicated resource to help schools and parents have meaningful conversations with children about their digital safety and wellbeing.

Written by experts and packed with insights and how-to guides, the Online Safety Hub provides a valuable destination for leaders, pastoral staff, teachers, and parents to build their knowledge, stay abreast of trends and help bridge the knowledge gap between themselves and the children in their care.

Key features:

- Guidance for teachers on key digital wellbeing topics to support rich, critical conversations and education in the classroom.
- App reviews by digital safety experts covering age suggestions & safety settings to help parents and staff stay up to date with the latest tech trends.
- Staff Resource section that hosts a rich library of curriculum-linked lessons related to digital safety and wellbeing topics.
- Community reassurance of the importance the school places on digital safety and wellbeing.

Qustodio

Fully integrated parental control tools for school devices

Powered by Qustodio, the leading parental control app globally, Linewize Connect extends digital visibility and control of school devices to parents.

Directly from Linewize Connect schools can give parents advanced controls for school devices outside of school hours, allowing them to play an active role in their child's digital life. IT departments decide which policies and rules apply to the school device, and parents can set the rules for their children –extending the safety network and sharing the responsibility.

But it goes further.

Linewize Connect comes with an additional license per student for our parental control app Qustodio. Allowing parents to protect 1 personal device, at no extra cost. No conditions.

Key features:

- Parents can decide which sites or apps their child can access and block potentially harmful ones at any given point in time.
- Parents can log in to the real-time dashboard from any device at any time to check their child's digital activity and adjust their settings.
- Real-time alerts mean they'll know as soon as their child tries to access inappropriate or harmful content, or becomes vulnerable online.
- Parents can help their children avoid screen addiction, ensure better sleep routines, and preserve family time by setting consistent time limits and screen-free periods and set their own family rules on school-issued devices outside of school hours to meet their family's needs.

Meeting the evolving cyber safety needs and responsibilities of school communities

We understand that every school is unique, and its cyber safety needs and responsibilities are continually evolving, especially with the prevalence of technology in education and the accompanying rise in online risks and negative behaviours.

Schools considering 1:1 programs will see an increased need for greater control, safety, and support for their devices and students' online activities.

Linewize Connect offers more than just technology.

Linewize Connect is Future Proof

A platform that grows as you grow. Schools can configure Linewize Connect to meet their current requirements. Then, as their digital wellbeing objectives develop, they can introduce additional features and functionality without shopping for new solutions.

Everything from One Partner

Schools get everything they need from a single partner, simplifying their experience. This means dealing with one invoice, one contract, and one company. Ultimately saving valuable time, reducing costs, and eliminating unnecessary headaches down the line.

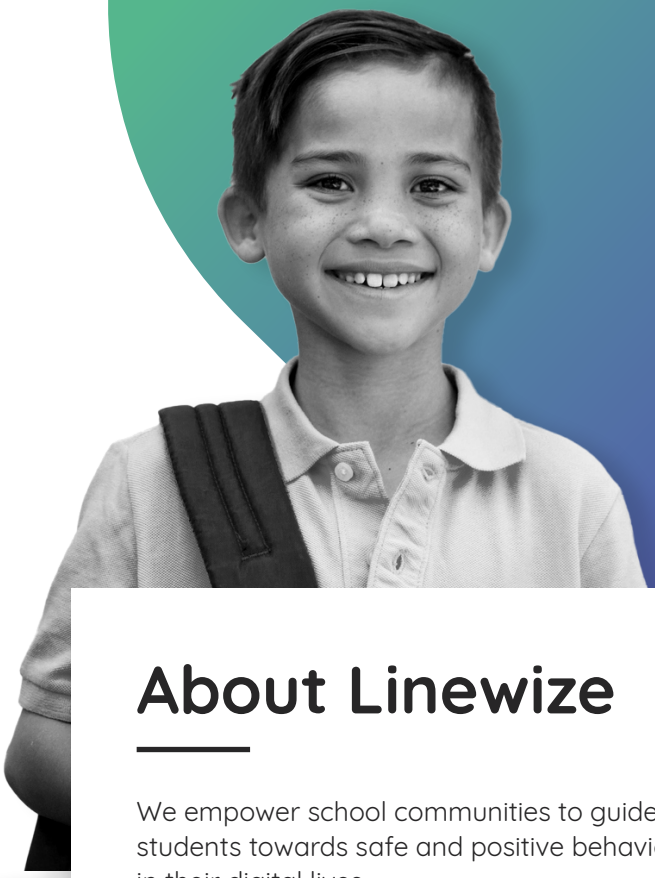

Expert and Local Support for the Long-term

Our dedicated customer success and account management teams support our schools throughout their lifetime with us. Our teams have 100+ years of combined experience guiding customers through onboarding, online training, professional development, and personal support and beyond.

Linewize Connect Impact

Every day Linewize Connect protects and supports:

30 million students

9 million families

32 thousand schools

About Linewize

We empower school communities to guide students towards safe and positive behaviours in their digital lives.

When students know how to stay digitally safe and well, their confidence grows, their resilience increases, and their learning improves.

We combine Digital Safeguarding Technology, child psychology expertise, in-depth educational material and awareness initiatives to help schools build positive digital cultures – where students can thrive.

As the digital landscape has evolved, so have we. From our humble beginnings in user authentication and content filtering, we're now part of one of the biggest digital safety and wellbeing providers in the world. 32,000 schools and 30 million students rely on our technologies and educational programs every day.

Our goal is to work together to save and better children's lives, empower parents, deliver for tomorrow's educators, and to be a key influencer in digital safety globally.
