

Online safety **school** **consulting** services

Tailored solutions from ySafe and Linewize

A collaborative approach to online safety

Technology alone - no matter how powerful - can't solve every challenge schools face in today's fast-changing digital landscape. That's why ySafe and Linewize have partnered to provide schools with a holistic solution. Whether it's providing help with your Linewize launch - or delivering a comprehensive program to promote digital citizenship across your school community - Linewize and ySafe provide support at the most appropriate level for your school.

Who is ySafe?

ySafe was founded in response to growing concerns amongst parents and school communities regarding children's online activities, and the increasing prominence of technology-related developmental and behavioural issues. ySafe's approach has also been one of a pro-technology ethos, uniquely focussing on the social & emotional components of cyber safety and online behaviours.

Our combined experience in child development, research, policing, and classroom contexts has provided us with a unique insight into the challenges and opportunities that participating in a digital environment presents to students, parents, and schools.

ySafe has become **Australia's leading provider of cyber safety education**. We are known for our eclectic team of **child psychologists, ex-police officers** and **teachers** who specialise in cyber safety.

ySafe have a unique set of packages to cover cyber safety across the entire school community. See below for more information about what's included.

Need more information? Contact us at sales@linewize.io to find out more information about these programs.

YEAR 1

Foundation program

These sessions establish the core competencies for student digital citizenship education. Focusing on key issues such as online strangers, cyberbullying and online conflict, respectful relationships and digital wellbeing these sessions ensure students acquire the essential knowledge to safeguard themselves in online environments.

9 STUDENT SESSIONS | 3 PARENT SESSIONS | 2 STAFF DEVELOPEMENT SESSIONS

YEAR 2

Interactive program

Building upon student learning outcomes in year 1, these sessions are delivered in smaller group cohorts and deep dive into topic specific information, based on identified key risk areas for students' developmental stages. Covering education on Personal Private Information, Cyberostracism, Echo Chambers and Filter Bubbles, Pornography, Online Reputation and Catfishing, these sessions address the nuances young people need to understand to protect themselves and to thrive online.

18 STUDENT SESSIONS | 3 PARENT SESSIONS | 2 STAFF DEVELOPEMENT SESSIONS

YEAR 3

Consolidation program

The third year of the program focuses on consolidation and supporting the students as they transition to the next stage of their digital lives. Returning to the format of the foundation year, the key themes for each student mature to support where they are now in their digital development, and to evolve their understanding of the key online risks so their earlier learnings can be put into everyday practice.

9 STUDENT SESSIONS | 3 PARENT SESSIONS | 2 STAFF DEVELOPEMENT SESSIONS

Also included in the provision of services provided by the Digital Wellbeing Package are:

- 3 year subscription to Online Safety Hub and Digital Education Curriculum
- ySafe Policy Package (Including ICT, Mobile Devices and Privacy Policies, plus implementation guides).
- Incident Management Consultation by ySafe's team of online safety experts
- School Digital Wellbeing Consultation Session

MULTI YEAR

\$9,995 p/year

Digital Wellbeing Program

About Linewize

We empower school communities to guide students towards safe and positive behaviours in their digital lives. When students know how to stay digitally safe and well, their confidence grows, their resilience increases and learning improves.

We combine safeguarding technology, child psychology expertise, in-depth educational material and awareness initiatives to help schools build positive digital cultures - where students can thrive.

As the digital landscape has evolved, so have we. From our humble beginnings in user authentication and content filtering we're now part of one of the biggest digital safety and wellbeing providers in the world. 23,000 schools and 12 million students rely on our technologies and educational programs everyday.

Our goal is to work together to save and better children's lives; empower parents; deliver for tomorrow's educators and to be a key influencer in digital safety globally.
