

# Think Before You Trust the Bot!

AI doesn't know you.

It doesn't know what's true.

It doesn't know what's safe.

**Before acting on anything an AI tells you:**

## **1. Check with a human**

AI isn't a counsellor. If something matters, check with someone who cares.

## **2. Check the motive**

Is this bot designed to help you — or to keep you talking? AI is engineered for engagement, not ethics.

## **3. Check for context**

AI doesn't know your background, emotions, or consequences. What would change if it did?
